4. There is a formula to find the efficiency of the developers. Efficiency = ((followers*100/1000000) * (multipliers*100/20))/100. Show the efficiency of each developer in a column named "Efficiency" along with their name.

Command:

```
select name, cast((((followers * 100.0 / 1000000) * (multiplier * 100.0 / 20)) / 100 as decimal(5, 2)) as Efficiency from Developers;
```
